

An introduction to THE TREES GROUP

THE TREES GROUP

THORPETE GAS SERVICES

The regeneration & construction group

A Unique Conference Environment

LANDSCAPING & MAINTENANCE

The Largest Multi-Discipline Social Enterprise In The East Midlands

TREES (Training, Regeneration, Education, Employment and Sustainability Ltd) is proud to be a significant player in the East Midlands social enterprise economy. With four subsidiary social enterprises under our umbrella, we've shown that our objectives to build better lives and better communities can be achieved in a self-sustaining enterprise environment. In doing so, we've brought excluded groups into the labour market, raised skills levels, embraced a new learning agenda and much more.

The Complete Service

- ◆ Construction and regeneration
- ◆ Gas maintenance and installation
- ◆ Landscaping and maintenance
- ◆ Conferencing and training

Whilst they operate in a diverse range of market sectors, our subsidiary enterprises share a commitment to social, physical and economic regeneration. As a Group, our successful strategy of investment and growth is continuing.

Unique Approach

As well as the quality services of our subsidiaries, we provide consultancy support to companies that are looking for solutions in a changing marketplace, assistance to get a fledgling social enterprise off the ground, or want to explore the benefits of a group structure.

Furthermore, our team includes authoritative public speakers who can talk on all aspects of social enterprise.

The Organisation

TREES is run by an unpaid voluntary board, which is supported by the Group Chief Executive John Montague. The group benefits from expert staff support from across the companies and is proud of its successful record in balancing financial returns with the ability to deliver social outputs via gift aid from the group.

TREES is able to successfully compete in the commercial marketplace in winning business and providing excellent customer service.

"Our customers not only get the best service, but can be similarly proud that they contribute towards our support to generate jobs and support communities", says John Montague.
